

CUSTOM CAPABILITIES

October 19, 2009

This is a custom height enclosure, in Advantage Gray, designed to maximize cable management, in a manufacturing environment.

At 91"H X 32"W X 32"D, this enclosure offers 48 RMU and a number of options for the mounting of larger cable bundles to its rails. In comparison, Great Lakes largest standard enclosures are 84"H with 44 RMU.

Pallet-mounted on levelers, this enclosure is still able to ship in a standard trailer.

At Great Lakes, we've engineered many enclosures of custom sizes to meet specific customer requirements. These enclosures can be manufactured up to 105"H x 36"W x 48"D. If you need a custom enclosure that is outside of these measurements, please call 1-866-TRY-GLCC.

(For reference, Maria is 5' 4" tall)
