

CUSTOM CAPABILITIES

September 21, 2009

This is a custom wall mount enclosure which provides 9 RMU in a tiered format within a 44" H X 25.25" W X 9.35" D vented box. The bottom includes vents, a conduit knockout and a dual-fan kit. The top has six knockouts and the top mounting area includes an adjustable hinge EIA mounting bracket.

This wall mount is secured via six sets of key hole locations within the box itself and two exterior flanges, all designed to be stud mounted 16" on center. The top flange has a key hole and the bottom flange has "u" openings for easy and secure installation.

The door to the box has vents in the front and bottom. It has two hinges and two locking latches. This product is designed to house fiber, a 24 port patch panel, a CCTV power supply and a UPS. It has a weight capacity of approximately 200 pounds.
