

GREAT LAKES N12K ENCLOSURES

NEMA Type 12K rated enclosures provide the best protection to rack mount equipment while deployed in indoor environments such as manufacturing facilities, parking garages, and basements. Externally mounted AC units (ranging from 2,500 to 20,000 BTU) and an internal baffle kit ensures that rack mount equipment maintains proper operating temperatures regardless of the surrounding enclosure environment.

In stock and able to ship within
24-48 hours after receipt of order.

Key Features

- Depth adjustable 19" mounting rails; 3/8" sq. (M6)
- Front intake and rear exhaust gland plates on doors for fan/filter assemblies
- Internal baffle kit facilitates airflow: conditioned air is directed to equipment intake while exhaust is returned to the AC unit for increased efficiency
- Two vertical lacing bars with obrounds for cinch straps and keyhole pattern for button mounting PDUs
- Top and bottom conduit knockouts
- Swing handle (with hasp option) and three-point latch maximizes compression between the door and enclosure
- Four top, lifting lugs
- UL508A Listed, RoHS II Compliant
- Country of Origin, Made in the USA
