

# EZ SERIES ENCLOSURES

The structural integrity of the EZ enclosure provides protection to rack mount equipment that is deployed in areas prone to seismic activity or locations subject to vibrations caused by aircraft, rail transport, etc. A robust design allows the EZ to accept GLCC's standard accessories in support of airflow, internal and external cable management, power, and security.

In stock and able to ship within  
24-48 hours after receipt of order.

- 3/8" sq. (M6) mounting rails include Flexible Mounting Profile (FMP): a series of holes along rails for zero-U mounting
- Two sets of standard PDU button mount brackets that allow mounting of major industry PDUs
- Laser etched knockouts for cable access along the top and side of the enclosure
- Recessed mesh front and rear doors feature a 3-point latching swing handle
- Tamper resistant side panels are internally secured and flush to enclosure frame
- Removable top panel options that include solid, perforated, and fan assemblies
- Compatible with standard vertical, horizontal, and overhead cable accessories
- GR-63-CORE Compliant, RoHS II Compliant
- Country of Origin, Made in the USA
