

GREAT LAKES COLO ENCLOSURES

The Colo from GLCC® is a multi-compartment enclosure that provides distinct segregation and access control to each compartment. When deployed in a hosting facility, the colo provides a secure mounting space for multiple customers in a single footprint. The enclosure is also ideal in a single-tenant data center to limit user access to specific pieces of rack mount equipment.

2 and 3 compartment enclosures
in stock and ready to ship.

- 3/8" sq. (M6) Mounting rails include Flexible Mounting Profile (FMP): a series of holes along rails for zero-U mounting
- Cutout patterns along each rail for quick installation of cable rings and cinch straps
- Dedicated vertical cable management raceways to each compartment cannot be accessed from other compartments
- Full height, tamper resistant side panels internally secured from all compartments
- Each compartment has a swing handle with a unique locking core
- Top and bottom cable access knockouts so cable raceways can be oriented as needed
- Mesh or Plexiglas front door; mesh or solid (with exhaust fans) rear door
- UL2416 Listed, RoHS II Compliant
- Country of Origin, Made in the USA
