

# S I E

## + STANDARD INDUSTRIAL ENCLOSURES

A standard portfolio of UL508A Listed, NEMA 250 Type 3R, 4, 4X, and 12K wall mounts and enclosures serve as the basis for most customer requirements. NEMA 12K indoor products are stocked and available for immediate shipment. NEMA 3R, 4, and 4X indoor/outdoor products are not stocked; however, have been tested and certified to a maximum size that allows enclosures to be manufactured to any dimension needed (up to a maximum size) and still maintain a UL listing. All standard enclosures can be modified to include specific materials, coatings/finish, accessories, thermal management, and mounting options. Specifications of product will dictate required lead times; however, in-house testing for compliance with multiple UL, NEMA, and IP standards drastically reduce typical industry lead time.

---

### COATING/FINISH

- Powder coat
- Color
- Smooth
- Textured

### AIR FLOW

- Fans
- Filters
- AC unit
- Heat exchangers

### MOUNTING OPTIONS

- Wall mount kit
- Pole mount kit
- Pad mount feet
- Pad mount riser

### ACCESSORIES

- EIA spaced rails
- Back panel
- Door stop kit
- Data pocket
- Grounding kit and bus bar
- Observation window
- Intelligent access control

### MATERIAL/CONSTRUCTION

- Cold rolled steel
- Stainless steel 304 and 316
- Aluminum
- Single door
- Double door
- Mullion
- Non-mullion
