

WMCM SERIES WALL MOUNTS

The WMCM provides users with dedicated space outside of the offset 19" mounting rails so that cables can be efficiently routed.

Unique mounting rails with integrated cable management features and nearly 3.5" of extra interior space reduces the possibility of crushing cables and causing kinks, problems commonly found in other wall mounts.

Offset 19" mounting rails for improved cable management

- 24, 36, and 48" heights available
- Two pair of #12-24 tapped mounting rails for quick installation of network equipment
- Rails feature a horizontal/vertical cable tie down pattern and provisions for optional cable management "D" rings
- Depth adjustable rails and 29" usable depth provides space for larger pieces of rack mount equipment
- Nominal concentric conduit knockouts on top, bottom, and back of rear section
- Front door accepts standard swing handles
- Reversible mounting for left- or right-hand opening
- Provisions on top and bottom for fan assembly
- UL2416 listed; RoHS II Compliant
