

# WDX SERIES WALL MOUNTS

The WDX is a 32"D product that provides ample space and support for deep servers and heavy cable bundles. The center swing section features a 90° stop that gives users access to the front and rear of equipment, while the fully welded back panel with bottom "shelf" supports the section to eliminate deflection typically caused by heavy rack mount applications.

In stock and able to ship within  
24-48 hours after receipt of order.

- 24, 36, and 48" heights available
- Features up to a 350 lb. weight capacity
- Two pair of 3/8" sq. (M6) mounting rails with RMU labels and hardware
- Front pair of rails is part of a depth adjustable inner frame that provides increased support for heavy equipment
- Removable rectangular gland plate (with nominal concentric conduit knockouts) on top of the rear section
- Front door frame accepts plexi, mesh, and solid inserts that can easily be swapped in the field
- A standard door handle cutout on the front section accepts GLCC's swing handles and does not require physical modification for intelligent access handles
- Removable gland plate on top of center section for fan assembly
- UL2416 listed; RoHS II Compliant
