

OVERHEAD CABLE MANAGEMENT

Eliminate overhead infrastructure changes to the data center by utilizing overhead cable management options from GLCC®. Standard ladder rack brackets (to support ladder rack and basket tray) and top cable troughs easily install to provide cable support on top of ES, EN, and EZ enclosures. Custom options can facilitate cables across aisle rows and around existing overhead infrastructure.

Note: Interior product dimensions and outside diameter (OD) of cables determine a 50% fill ratio; CAT 6 OD, .25; CAT6A OD, .3

Overhead cable management for
ES, EN, and EZ Enclosures.

Ladder Rack Brackets

- Fixed LRB, 3"H bracket to support up to 24"W ladder rack and basket tray
- Adjustable LRB, height adjustable bracket for use with various height enclosures in a single row

Standard Top Cable Trough

- 6.5"W x 4"D trough with large opening to route cables from the enclosure
- Optional end cap available
- Cable fill ratio: CAT6, 161; CAT6A, 120

High-Density Top Cable Trough

- 12"W x 8"D trough with a 3" bend radius to support large cable bundles
- Optional end cap available
- Cable fill ratio: CAT6, 588; CAT6A, 494
