Aisle Containment Doors with Quick Release

As part of most cold aisle containment solutions, panels are placed above or across the top of enclosures and doors are installed at each end of the aisle. This enclosed area is now able to capture as much conditioned air as possible or isolate and remove as much exhaust air as possible. Together, Great Lakes ES enclosures and aisle doors provide a seamless containment solution.

Features

- Push open from inside the aisle; pulled open from outside of the aisle
- Slide open from inside or outside the aisle
- Available in black or advantage white for 42, 44, and 48 RMU ES enclosures
- Installed across aisle widths of 48-72"
- Brush grommet along bottom and outer edge to seal openings and prevent air recirculation
