PDU1

Proper management of power is a major concern within any enclosure. Data center managers want to have as much flexibility as possible with their enclosures, as they manage their power needs. They also want to be sure they do not lose any possible mounting space within the enclosure's rail pattern.

The PDU1 brackets manufactured by Great Lakes Case & Cabinet can provide a viable solution to the mounting of power distribution units. Available in sets of two, the PDU1 mounting brackets allow the vertical mounting of any type of 1 RMU equipment (such as a power strip) without occupying any RMU space.

The PDU1 mounting bracket is designed for use in Great Lakes' 30.00" wide ES and 29.00" wide E Series Enclosures.

To learn more about the mounting flexibility offered by the PDU1 mounting bracket, talk to your Great Lakes representative or call 1.866.TRY.GLCC (879.4522) You can also visit us on the web at werackyourworld.com

PART NO.
PDU1
